

SYSTEMS AND METHODS FOR
PROVIDING A TRADING INTERFACE

Abstract of the Disclosure

Systems and methods for configurable trading
5 interfaces that allow a trader to quickly and easily
submit trading commands to a trading system are
provided. Using these systems and methods, a trader
can using various trading interfaces to initiate
trading commands, configure various display features
10 and default command settings, and control a level of
command entry verification that is provided to protect
against inadvertent entry of incorrect trading
commands.
